

Risk Ranking Approach

To Driving Operational Excellence

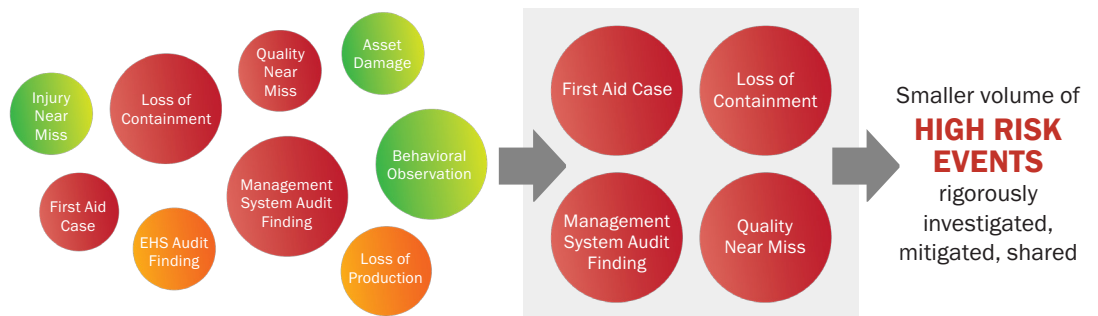

Amid the numerous components of any industrial infrastructure unit, dangers lurk at every point along the way. A lot is at stake including safety of personnel, a company's reputation and investor capital. It is critical that organizations have a robust framework in place to gather, prioritize and take action on events that could occur with fatal or disastrous consequences. The results from a recent Sphera study indicate that a lot of work remains to be done.

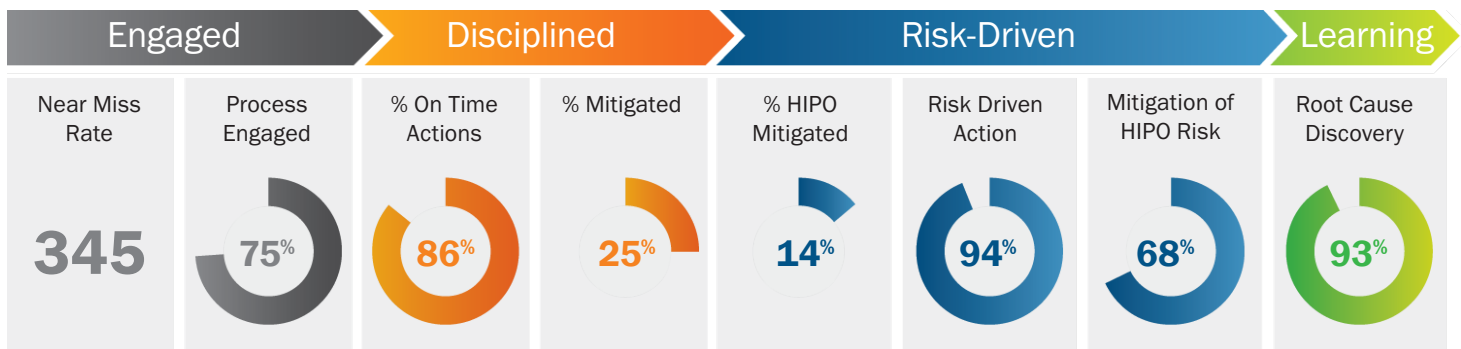

Establish a progressive approach to managing events

Focus the organization on the highest priority near misses

Benchmark Metrics
